Educational Tour for 62nd Annual International Conference of Association of
Microbiologists of India (AMI),
Microbes & Society: Current Trends & Future Prospects (MSCTFP- 2022)
Organized by University of Mysore, Mysore
21st to 23rd September 2022

An educational tour to Mysore was organized by Department of Biosciences with a motto of exchanging research ideas with scientists and research scholars at the international level. This also helped students understand and come across new updates in various fields of Microbiology and Biotechnology. Large number of renowned scientists delivered lectures on their field of expertise in the conference. A group of six members consisting of 4 students one research scholar and a teacher visited University of Mysore for participating in 62nd Annual International Conference of Association of Microbiologists of India (AMI), Microbes & Society: Current Trends & Future Prospects (MSCTFP - 2022) by University of Mysore, Mysore from 21st to 23rd September 2022.

Association of Microbiologists of India is a very renowned and prestigious association of microbiologists. It was established in 1938 and every year numerous microbiologists and biotechnologists gather for this annual conference and share their research findings and development in varied fields of microbiology. This year the conference witnessed 1500 scientists and students from different parts of the country and overseas. More than 500 poster presentations and 300 oral presentations were done by researchers in the intellectual meeting. The deliberations were categorized in various branches of Microbiology such as Food Microbiology and Fermentation, Microbiomics, Viruses & Vaccines, Host-microbe interactions, Agricultural Microbiology, Environmental Microbiology, Microbial Systemics and Ecology, Microbial Therapeutics and Antimicrobial Resistance, Advanced Microbial Diagnostics/Diagnostic Tools, Industrial Microbiology and Microbial Nanotechnology.

We participated and presented research work done in the Department of Biosciences at Maharaja Ranjit Singh College of Professional Sciences. This year we presented five research posters in the conference.

Kshitij Bhushan presented his work in the conference on *Biosynthesis of silver nanoparticles under different monochromatic lights using Spirulina and its antimicrobial activity* under the guidance of **Dr. Monica Jain**. The study focuses on biosynthesis of Silver nanoparticles using *Spirulina* under different monochromatic lights. Microbial synthesis of NPs is an approach that interconnects nanotechnology and microbial biotechnology. The nanoparticles synthesized were analyzed under UV-Vis spectroscopy & TEM to analyse the effect of monochromatic lights. The NPs inhibited *E.coli*.

Abhyajali Tripathi also mentored by Dr. Monica Jain and Dr. Sheetal Bhasin presented a poster on *Study of Antimicrobial Activity of in vitro Obtained Embryogenic Callus and Natural Plant Extract of Hardwickia Binata: An Endangered Medicinal Forest Tree Species*. *Hardwickia binata* is an endangered medicinal forest species with high fodder value for ranch animals. Tissue culture techniques were applied to preserve the important species and analyzing the antibacterial activity of natural plant leaf extract and in vitro obtained embryogenic callus extract against two gram positive and two gram negative bacteria. Antibacterial activity of was observed against tested organisms.

Janhavi Singh presented her work in the conference on *Molecular Characterization of Actinobacteria Instrumental in Bioremediation of Textile Dyes* guided by Dr. Sheetal Bhasin. She has isolated dye degrading Actinobacteria. The dyes present in the industrial effluents are very harmful for flora and fauna and must be degraded and converted into harmless form. The microbes isolated by Janhavi can be put to use for bioremediation of industrial effluents thus conserving the nature

Akanksha Dhamecha worked for her M. Sc. dissertation under the guidance of Dr. Sheetal Bhasin on *Stability Studies of Glucose Isomerase Enzyme from Streptomyces Sp. Strain T.S.AKP* and presented this work in the international conference. She worked on Glucose isomerase (GI) which is used for the production of High Fructose Corn Syrup (HFCS). HFCS is used as a sweetener in food and pharmaceutical industries.

Saket Mishra, a Ph. D. student of Dr. Sheetal Bhasin won Best Research Poster Presentation Award for *Assessing the Antagonistic Activity of Actinobacteria against Plant Pathogen Erwinia carotovora*. Saket Mishra has found an Actinobacterial strain which is capable of inhibiting the growth of a plant pathogen *Erwinia carotovora* subsp. *Carotovora*. *Erwinia* causes disease in numerous fruits and vegetables such as potato, tomato, banana, chilli, carrot etc. which leads to huge quantity of loss in these crops. Large amount of chemical fertilizers and insecticides are used to increase plant productivity and prevent plant diseases. These chemicals exorbitantly destroy the soil health and soil fertility. They also cause fatal diseases in the human beings and animals. With this kind of environmental situations around us it is very important for us to find out sustainable solutions to increase the crop productivity and reduce the agricultural loss. He has used soil inhabiting microbes, the Actinobacteria for the production of antibiotics against plant pathogenic bacteria.

This tour helped students widen their horizon of knowledge and experience the knowledge sharing platform.

Notice

Post AMI Conference Session

All B.Sc. & M.Sc. Biosciences students are hereby informed that Department of Biosciences is organizing a **Post AMI Conference Session** on 1st October 2022 in College Auditorium at 2.00 PM. Students who had participated and presented posters in the conference will share their overall experience during the session.

DEPARTMENT OF BIOSCIENCES

"POST AMI CONFERENCE SESSION"

1st October 2022

Dr. Sheetal Bhasin along with 4 PG students and a research scholar attended 62nd Annual International Conference of Association of Microbiologists of India (AMI), Microbes & Society: "Current Trends & Future Prospects (MSCTFP- 2022)" organized by University of Mysore, Mysore from 21st – 23rd September 2022. A post AMI session was conducted by Department of Biosciences on 1st October 2022 in college auditorium. The session was attended by all PG students and faculty members in which all the 5 participants presented their work and shared their experiences.

Kshitij Bhushan presented his work on "*Biosynthesis of Silver Nanoparticles under different monochromatic lights using Spirulina and its antimicrobial activity*".

Abhyanjali Tripathi presented her work on "*Study of Antimicrobial Activity of in vitro obtained Embryogenic Callus and Natural Plant Extract of Hardwickia binata*".

Janhavi Singh presented her work on "*Molecular Characterization of Actinobacteria Instrumental in Bioremediation of Textile Dyes*".

Akansha Dhamecha presented her work on "*Stability Studies of Glucose Isomerase Enzyme from Streptomyces Sp. Strain T.S.A.KP*".

Saket Mishra (Research Scholar) presented his work on "*Assessing the Antagonistic Activity of Actinobacteria against Plant Pathogen Erwinia carotovora*".

All the participants were appreciated by Chairman Dr. Ram Shrivastava and Principal Dr. Anand Nigohkar. Other students were highly motivated by their presentation and enthusiastically asked a number of queries regarding their research work and presentation.
