BRIEF REPORT

❖ Date of Program: 06.02.2024 – 29.02.2024

❖ Objectives:

National Science Day is celebrated each year on February 28th to honor the remarkable discovery of the "Raman Effect" by the eminent scientist Sir C.V. Raman.

Our objectives to celebrate National Science Day include:

- **Commemorating Sir C.V. Raman's Legacy:** The day serves as a tribute to Sir C.V. Raman for his groundbreaking discovery, highlighting his contributions to the field of science and inspiring future generations
- **Career Exploration:** Help students explore potential career paths in scientific research, engineering, and related disciplines.
- **Educational Enrichment:** Provide students with hands-on experience and exposure to advanced technologies and scientific research.
- **Inspiration:** Motivating students to showcase their innovative and creative approach to show their knowledge on Indigenous Technologies by different activities.
- **Networking:** Facilitate interaction between students and resource person to foster mentorship opportunities and future collaborations.
- **Understanding:** Enhance students' understanding of complex scientific concepts through practical demonstrations through various competitions.

❖ Outcomes:

- **Deepening Knowledge in Science and Technology:** Students enrich their comprehension of both traditional and cutting-edge technologies within the realms of science and its associated disciplines.
- **Skill Enhancement:** Engaging in practical demonstrations and hands-on experiences enhances students' technical prowess and their capacity to tackle problems effectively.
- **Awareness of Career Possibilities:** Exposure to the field provides students with a clearer understanding of the various career opportunities available in scientific research, engineering, and similar sectors, potentially guiding their future educational and professional decisions.
- **Inspiration for Future Endeavors:** Interactions with pioneers in research and first-hand experiences of advanced scientific work motivate students to embark on further education or careers within the science and technology sectors.
- **Building Professional Networks:** Participation in these experiences allows students to form valuable connections with industry professionals, opening doors to future internships and research projects.

Launch of National Science Day theme 2024 by Union Minister Shri. Jitendra Singh
This year "Maharaja Ranjit Singh College of Professional Sciences", arranged a program to attend the virtual Ceremony of the launch of National Science Day- 2024 theme by Department of Science & Technology, National Media Centre, Raisina Road, New Delhi for the students of our college. On February 6, 2024, Union Minister Shri. Jitendra Singh eminent guest of the function inaugurated the National Science Day theme "Indigenous Technologies for Viksit Bharat", for the year with great enthusiasm and fervor. The theme, carefully chosen to reflect the current scientific landscape, undoubtedly serves as a beacon for the nation's scientific community. Dignitaries on the dias emphasized the pivotal role of science in driving progress and solving social challenges. The theme, unveiled with much anticipation, is expected to inspire and ignite a passion for scientific inquiry among the youth. As the nation collectively embraces this year's theme, it is poised to witness a renewed commitment to scientific exploration and innovation, fostering a culture of curiosity and discovery across the country. The program was attended by college faculties including college chairman Dr. Ram Shrivastava, Dr. Anand Nighojkar, Principal & Dr. Dipak Sharma Program Coordinator, Prof. Deepika Choudhary, Prof. Seema Shintre. College Program was conducted by Prof. Deepanshu Pandey and Vote of thanks was given by Dr. Lal Kumar Chandel.

Raja Ramanna Centre for Advanced Technology (RRCAT) celebrated the National Science Day (NSD-2024) on February 25, 2024. The event was organized in RRCAT premises on February 25, 2024 during 1000 to 1300 Hrs. Students of Maharaja Ranjit College have been invited to participate in NSD-2024 celebration. 23 Students along with two Faculty Dr. Sheetal Bhasin and Dr Geeta Suri visited the Raja Ramanna Centre for Advanced Technology (RRCAT) located in Indore. The visit aimed to provide students with insights into advanced scientific research and technologies being developed at RRCAT. The visit was organized to enhance students' understanding of nuclear science, accelerator technology, and other areas of advanced research conducted at RRCAT. It aimed to inspire students to pursue careers in science and technology and to expose them to real-world applications of theoretical concepts learned in classrooms, visit to RRCAT was a resounding success, providing students with a memorable and enriching experience.

Dr. Asmita Sharma, Associate Professor, Department of Chemistry, Shri Vaishnav Vidyapeeth Vishwavidyalaya, Indore, delivered a captivating lecture on the "Contribution of Indian Scientists in Viksit Bharat." In her enlightening discourse, Dr. Sharma delved into the remarkable achievements and invaluable contributions of Indian scientists that have played a pivotal role in the development and progress of the nation. She highlighted the rich legacy of scientific innovation in India, spanning diverse fields such as space exploration, technology, medicine, and environmental science. Dr. Sharma's lecture not only celebrated the accomplishments of Indian scientists but also served as an inspiration for the students, encouraging a deeper appreciation of the nation's scientific heritage and its ongoing impact on the development of a vibrant and thriving India.

Puzzle Competition

Students brought numerous fun and interesting puzzles to the competition. The winners of the puzzle contest were Narayan Dwivedi in first place, Amit Kumar Shukla in second place, and Nikhil Gavhankar in third place. It was an engaging event where students showcased their problem-solving skills and creativity. The puzzles were tricky, but these winners did an excellent job figuring them out. It was a delightful celebration of the intelligence and creativity of students! The competition was judged by Dr. Asmita Sharma, and the winners were awarded cash prizes of ₹500, ₹400, and ₹300 respectively, along with 10 consolation prizes provided by our college.

Valedictory & Prize Distribution Ceremony

The Vigyan Mela (Science Fair) event at Maharaja Ranjit Singh College of Professional Sciences concluded with a grand valedictory ceremony. The ceremony commenced with the traditional lighting of the lamp by Dr. Ram Shrivastava, College Chairman, Dr. Anand Nighojkar, Principal the day's guest Dr. Asmita Sharma, Dr. Dipak Sharma, program coordinator, Dr. Sheetal Bhasin, Head, Department of Biotechnology, and Dr. Manoj Joshi, Head of the Department of Mathematics. In his welcome address, Dr. Anand inspired the students to pursue careers in science and technology. Following him, Dr. Dipak provided a succinct overview of the Vigyan Mela's significance and activities. The participants were

not only acknowledged for their efforts but were also rewarded with cash awards, winner kits, and consolation prizes, aiming to encourage everyone who took part. To conclude the program on a patriotic note, the national anthem was played, and the day's success was immortalized with a group photo. This final ceremony marked the official and successful end of the Vigyan Mela festivities, recognizing the contributions and achievements of all participants. The program was conducted by Prof. Deepanahu Pandey, who ensured its smooth flow and organization. Following the conclusion, Dr. Lal Kumar Chandel expressed gratitude and appreciation in a vote of thanks. This gesture acknowledged the collective contributions of participants, organizers, and attendees, emphasizing the collaborative effort that made the program a success.

• Impact of Program:

- 1. Popularization of Science & Technology:** Students gain a deeper understanding of indigenous and advance technologies, related to Science & technology and its allied subjects.
- 2. Enhanced Skills:** Exposure to practical demonstrations and hands-on activities improves students' technical skills and problem-solving abilities.
- 3. Career Awareness:** Students gain insight into potential career paths in scientific research, engineering, and related fields, which may influence their future academic and career choices.
- 4. Motivation:** Witnessing cutting-edge research and interacting with experts can inspire students to pursue further studies or careers in science and technology.
- 5. Networking Opportunities:** Students establish connections with professionals in the field, which may lead to internships and research opportunities.

• Findings from the National Science Day Event:

- 1. High Level of Engagement:** There was a significant interest and participation from students and faculty, indicating a strong appetite for science education and awareness activities.
- 2. Effective Educational Outreach:** The program successfully introduced participants to advanced scientific research and technologies, highlighting the practical applications and career opportunities in these fields.
- 3. Inspiration and Motivation:** Feedback indicates that the event inspired many students to consider further studies and careers in science and technology, demonstrating the event's potential as a motivational tool.
- 4. Collaborative Opportunities:** The interaction between educational institutions and research organizations like RRCAT proved to be fruitful, offering a platform for future collaborations and exchanges.

• Recommendations for Future Science Events:

- 1. Diversify Program Offerings:** Introduce a wider range of activities, such as workshops, interactive sessions, and hands-on experiments, to cater to diverse interests and learning styles.

2. **Enhance Participant Preparation:** Develop preparatory materials or sessions for participants to maximize their understanding and engagement during the event.
3. **Strengthen Inter-Institutional Partnerships:** Foster long-term collaborations with research institutions, industry, and educational bodies to provide a broader spectrum of opportunities to students, including internships and research projects.
4. **Expand Reach:** Consider organizing similar events in different regions or through virtual platforms to reach a wider audience, including underrepresented and remote communities.
5. **Implement a Mentorship Program:** Establish a mentorship scheme connecting students with professionals and researchers in their fields of interest, offering guidance and encouragement for their scientific pursuits.
6. **Follow-up Activities:** Organize follow-up activities or projects for participants to apply what they have learned, helping to cement their interest and understanding of scientific concepts.
7. **Feedback Mechanism:** Introduce a structured feedback mechanism to gather insights from participants ensuring continuous improvement of the program based on direct input.

By addressing these recommendations, future National Science Day events and similar programs can significantly enhance their impact, fostering a deeper appreciation and understanding of science among students and encouraging them to pursue scientific inquiry and innovation.

Abstract

Food crops require increased indigenous organic inputs for enhancement of the plant productivity. In this investigation we have attempted to isolate and characterize nitrogen fixing bacteria for increasing the productivity of *Triticum aestivum*. Isolation of Nitrogen Fixing Bacteria was done from soil samples collected from areas such as agricultural land, forest, garden, lake along with banyan and guava tree rhizosphere. Selective isolation on nitrogen free medium was performed to develop a collection of 23 cultures. The cultures were screened for nitrogen fixation ability. All the cultures exhibited positive ammonia production in the preliminary screening process but ten were found to be better. Eight out of ten cultures were positive for oxidase and nine for catalase test. None of the cultures could utilize citrate as a sole source of carbon but all were positive for indole production test. The best performing isolate N7G was able to utilize 7 sugars out of 8 and N6 could utilize 4 whereas other isolates could utilize only 2 or 3 sugars. N9 exhibited amylase production and none of the cultures could show HCN production.

Nitrogenase enzyme activity was found to be good in three isolates named NP-2, NP-9 and N7G which were picked up for *in-vivo* testing by pot assay method. The seeds of *Triticum aestivum* were treated with broth containing these best performing isolates. The *in-vivo* testing in pots revealed 117% increase in plant weight, 42.47% increase in total height of plant, 62.26% increase in the root length and 32.72% enhancement in shoot height. As compared to the 50% seed germination in control plant 91.66% seeds germinated in the plant treated with N7G and we observed a reduction in time required for germination from 72 hrs to 36 hrs. The increased plant productivity has paved way for field trials in future which shall be translated further to commercial level.

Key words: Nitrogen fixation, Pot assay, Nitrogen free medium

Respected Madam,

This letter of intent is in pursuit to procure authentic Actinomyces cultures (Total 10) that your Institute culture library of Department of Biosciences is possessing. The cultures that we are expecting to procure would be in common use for research purpose as collaboration between Swaminarayan University, Kalol, Silver Oak University, Ahmedabad and Maharaja Ranjit Singh College of Professional Sciences, Indore.

For your kind reference, following persons would be utilizing the cultures:

1. Dr. Edwin Pithawala, Associate Professor, Silver Oak University, Ahmedabad.
2. Prof. (Dr.) Sheetal Bhasin, Professor MRSCPS, Indore.
3. Dr. Pradeep Verma, Principal & Dean, Swaminarayan University, Kalol

The cultures shall be utilized for sole research purpose only.

Kindly do the needful in the said matter and do oblige.

Thanking you,

Yours truly,
