Department of Biosciences

Curriculum for Skill Development Workshop

Session 2016-2017

Biochemical Technical

- Estimation of reducing sugar in the food samples using Nelson Somogy's method.
- Estimation of protein content in the food samples using Folin Lowry's method.
- Qualitative examination of biomolecules in the food samples.
- Separation of amino acids using Thin Layer Chromatography.
- Determination of salivary amylase activity and examination of effect of pH and temperature on it.

Microbiological Techniques

- Antibiotic sensitivity test.
- Antimicrobial activity of medicinal plant extract.
- Preparation of medium for growth of microorganisms.
- Isolation and culturing of microorganisms from soil/water/ air. .

Molecular biology Techniques

- Extraction of DNA from plant material
- Agarose gel electrophoresis.
- Isolation of protein from plant material.
- Determination of protein concentration using spectrophotometer.
