## Maharaja Ranjit Singh College of Professional Sciences, Indore

Department of Biosciences

Lesson Plan - B. Sc. Year I Life Science (July 2020 -June 2021)

Micro+Chem+LS, BT+Chem+LS

Paper I- Introduction to Biochemistry, Cell Biology, Plant & Animal Diversity

• 1 3/4	B /F	D 0	
iicha Ma	VIa	Prot	Teacher -
IISIIA IVIA	VIA	FIOL.	reacher -

Teacher - Prof. Manisha Malik		
Day/Lecture	Unit	Topic
1		Carbohydrate Introduction and Properties
2		Classification of Carbohydrates
3		Classification of Carbohydrates and Functions
4		Lipids: Introduction
5	1	Classification, Structure and Function
6		Classification, Structure and Function
7		Vitamins: Introduction and Occurrence
8		Functions of Vitamins
9		Functions of Vitamins
10		Introduction to Amino Acids
11		Introduction to Proteins
12		Structure of Proteins
13		Functions of Proteins
14		Enzymes: Introduction & Classification
15	2	Factors affecting enzymaic activity
16		Mechanism of enzyme action
17		Kinetics of enzyme catalyzed reactions
18		Introduction to Nucleic Acids
19		Structure & Function of DNA
20		Structure & Function of RNA
21		Structure of Prokaryotic Cells
22		Structure of Eukaryotic Cells
23		Structure & Function of Plasma Membrane
24		Structure & Function of Plasma Membrane
25		Structure & Function of Endoplasmic Reticulum
26	3	Structure & Function of Golgi Apparatus
27	3	Structure & Function of Lysosomes & Ribosomes
28		Structure & Function of Mitochondria
29		Structure & Function of Chloroplast
30		Structure & Function of Nucleus
31		Cell division ( Mitosis)
32		Cell division ( Meiosis)
33		General Characteristics of Algae & its Economical Importance
34		General Characteristics of Fungi & its Economical Importance
35		General Characteristics of Lichens & its Economical Importance
36		General Characteristics & Adaptations of Bryophytes
37	4	General Characteristics & Adaptations of Pteridophytes
38	4	General Characteristics & Adaptations of Gymnosperms
39		General Characteristics of Monocot & Dicot Plants
L	ı	

40		Differences in Monocot & Dicot Plants
41		Anatomical Features of woody Plants
42		Economical Importance of Angiospermic Plants
43		General Characteristics of Annelieds & Arthropods
44		General Characteristics of Mollusca & Pisces
45		General Characteristics of Amphibians & Reptiles
46	5	General Characteristics of Aves & Mammals
47	3	Osmoregulation in Fishes
48		Parental Care in Amphibians
49		Salient features of Poisonous & Non-Poisonous Snakes
50		Flight Adaptation in Birds

Maharaja Ranjit Singh College of Professional Sciences, Indore			
Department of Biosciences			
Lesson Plan - B. Sc. Year I Life Science (July 2020 -June 2021)			
	Micro+Chem+LS, BT+Chem+LS		
Pa	aper II- I	Environmental Biology, Genetics & Evolution	
		Feacher - Prof. Sakina Indorewala	
Day/Lecture	Unit	Topic	
1		Structure & Function of Ecosystem	
2		Factors of Ecosystem & Ecological Pyramids	
3		Energy Flow in Ecosystem & Food chain	
4	1	Food Web & Trophics Levels	
5		Ecological factors - Ecological Adaptations in Plants & Animals	
6		Aquatic & Dessert Adaptation	
7		Ecological Succession - Hydrosphere & Xerosphere	
8		Environmental Pollution : Air Pollution	
9		Sources, Nature & Effect of Water Pollution	
10		Sources, Nature & Effect of Soil Pollution	
11		Sources, Nature & Effect of Noise Pollution	
12		Sources, Nature & Effect of Nuclear & Radioactive Pollution	
13	2	Ozone Layer Depletion & Acid Rain	
14		Global Warming	
15		Nitrogen Cycle	
16		Carbon Cycle	
17		Sulphur & Phosphorus Cycle	
18		Biofertilizers & Biopesticides	
19		Mendelian Laws of Inheritance	
20		Incomplete Dominance & Codominance	
21		Epistatsis, Complementary Ratio & Supplementary ratio	
22	3	Cytoplamic Inheritance, Plastid & Kappa particles	
23		Linkage & Crossing Over ( Coupling & Repulsion Hypothesis)	
24		Mechanism of Sex Determination	
25		Sex linked Inheritance	
26		Structure of Chromosomes	
27		Polytene & Lampbrush Chromosomes	
28		Chromosome related disorders - Klienfilter's Syndrome	
29	4	Turner's Syndrome, Down Syndrome & Cri du chat Syndrome	
30		Spontaneous & Induced Mutations	
31		Chemical & Physical Mutagens	
32		Molecular basis of Mutation	
33		Theories of Organic Evolution - Lamarckism & Neo- Lamarckism	
34		Darwinism & Neo- Darwinism	
35	~	Germplasm Theory & Mutation Theory	
36	5	Gene Pool & Random genetic Drift	
37		Hardy Weinberg Law	
38		Isolation & Types of Isolating Mechanisms	

## Maharaja Ranjit Singh College of Professional Sciences, Indore Department of Biosciences Lesson Plan - B. Sc. Year II Life Science (July 2020 -June 2021) Micro+Chem+LS, BT+Chem+LS Paper I- Morphology, Developmental Biology & Physiology of Angiosperms Teacher - Dr. Monica Jain Day/Lecture Unit The Root System: Organization of Root Apex 1 2 Anatomy of Root in Monocotyledons & Dicotyledons The Shoot System: Organization of Shoot Apex 3 Anatomy of Shoot in Monocotyledons & Dicotyledons 4 1 5 Anatomy of Leaf in Monocotyledons & Dicotyledons 6 Stomata: Mechanism of Stomatal movement 7 Secondary growth in Dicotyledons 8 Morphology of Flower 9 Microsporogenesis 10 Megasporogenesis 2 Pollination & Fertilization 11 Endosperm & Development of embryo in Monocotyledons & 12 Dicotyledons Plant Water Relations: Absorption of Water 13 14 Transpiration & Ascent of Sap 15 3 Photosynthesis: Photosyntehtic Apparatus 16 Pigments of Photosynthesis 17 Factors of Photosynthesis 18 Respiration: Glycolysis 19 TCA Cycle 20 Electron Transport in Mitochondria Pentose Phosphate Pathway 21 4 Nitrogen Metabolism: Biological Nitrogen Fixation 22 Nitrate reduction & its regulation 23 24 Ammonia Assimilation Structure & Function of Auxins 25 26 Structure & Function of Gibberlins 27 Structure & Function of Cytokinins 28 Structure & Function of Ethylene & Abscisic Acid 5 Photoperiodism & Vernalization 29 Phytochrome 30 Plant Movements: Autonomic or Sponataneous Movements 31 32 Paratonic or Induced Movements

## Maharaja Ranjit Singh College of Professional Sciences, Indore Department of Biosciences Lesson Plan - B. Sc. Year II Life Science (July 2020 -June 2021) Micro+Chem+LS, BT+Chem+LS Paper II- Morphology, Developmental Biology & Physiology of Mammals Teacher - Prof. Sakina Indorewala Day/Lecture Unit Topic Digestive system of Mammals: Structure & Function 2 Digestion & Absorption of Carbohydrates Digestion & Absorption of Lipids 3 Digestion & Absorption of Proteins 4 5 1 Secretory Function of Alimentary canal Excretory System of Mammals: Structure & Function 6 7 Structure of Nephron Formation of Urea 8 9 Formation of Urine Respiratory System of Mammals: Morphology of Respiratory 10 Organs 11 Mechanism of Respiration 12 Transport of Oxygen & Carbon dioxide by Blood 2 13 Circulatory System of Mammals: Morphology of Heart Course of Blood Circulation 14 Composition of Blood & its functions 15 16 Mechanism of Blood Clotting Muscular System of Mammals: Types of Muscles 17 18 Structure & Function of Muscles 19 Mechanism of Muscle Contraction 20 Nervous System of Mammals: Structure of Nervous Tissue 3 21 Neurons, Nerve fibers & Neuroglia 22 Mechanism of Nerve Impulse transmission 23 Reflex Action 24 Neuromuscular Junctions Endocrine System of Mammals: Structure & Function of 25 Pituatory gland Structure & Function of Hypothalamus gland 26 27 Structure & Function of Thyroid gland 4 Structure & Function of Parathyroid gland 28 29 Structure & Function of Pancreas 30 Structure & Function of Adrenal gland 31 Disorders of Endocrine Glands Disorders of Endocrine Glands 32 Reproductive system of Mammals: Structure of Male 33 Reproductive Organs Reproductive system of Mammals: Structure of Female 34 Reproductive Organs 35 Female Reproductive Cycles (Menstrual & Oestrus Cycle) Spermatogenesis 36 37 Oogenesis 5 Fertilization & its mechanism 38 39 Significance of Fertilization 40 Types and Patterns of Cleavage Process of Blastulation 41 Formation of Germinal Layers 42

43	Extraembryonic Membranes
44	Placentation in mammals

49		Stem cell Culture & its Applications

### Maharaja Ranjit Singh College of Professional Sciences, Indore Department of Biosciences Lesson Plan - B. Sc. Year III Life Science (July 2020 -June 2021) Micro+Chem+LS, BT+Chem+LS Paper II- Molecular Biology, Genetic Engineering & Plant Tissue Culture Teacher - Dr. Monica Jain & Dr. Fatema Matkawala Unit Topic Day/Lecture DNA Replication in Prokaryotes 2 DNA Replication in Eukaryotes 3 Semi Conservative Nature of DNA Replication 4 Transcription in Prokaryotes Transcription in Eukaryotes 5 RNA Processing - 5' Cap formation 6 7 3' End Processing Polyadenylation & Splicing 8 9 Transposable elements: Definition 10 Types of Bacterial transposons Applications of Transposons 11 Genetic Code-Important Characteristics 12 Prokaryotic Translation 13 Eukaryotic Translation 14 15 Regulation of Gene Expression in Prokaryotes 2 16 Operon Concept- Lac Operon Operon Concept- Trp Operon 17 Gene Regulation in Eukaryotic System 18 19 Promoters, Enhancers elements & Gene Amplification Isolation of Genomic & Plasmid DNA from Bacteria 20 Isolation of Genomic DNA from Plant & Animal cells 21 Cloning Vectors (pUC 19, Phage 2, Cosmid & M13) 22 23 Restriction Enzymes 24 Other enzymes in Ligation Technology Introduction of DNA into living cells 25 26 Methods of Gene Transfer 27 Expression & Detection of Clones Introduction to Blotting Technique 28 29 Western Blotting Southern Blotting 30 31 Northern Blotting Introduction to PCR, RAPD & RFLP 32 Terms & Definition of Plant Tissue Culture 33 34 Media Ingredients 35 Various Media & Sterlizing Agents Cell Culture: Initiation of callus & Isolation of Single cells 36 Suspension Cultures & Batch Cultures 37 Protoplast Culture & Cybrids 38 39 Applications of PTC in Horticulture, Agriculture & Pharmaceutical Industry 40 Clonal Propagation: General Techniques Factors affecting Clonal Propagation 41 Applications of Clonal Propagation 42 43 Production of Haploid Plants 44 Factors affecting Androgenesis 5 Limitations & Applications of Androgenesis 45 Plant Transformation: Methods of Gene Transfer 46

47	Agrobacterium tumefaciens mediated Transformation
48	Direct Gene Transfer methods
49	Selection & Identification of transformed cells

aharaja	Ranjit Singh College of Professional Sciences, Indo			
	Department of Biosciences			
Lesson	Plan for B. Sc. I Year Life Science (July 2020- June 2021)			
	BT+Chem+LS, Micro+Chem+LS			
	Subject: Practicals			
	Teacher - Prof. Sakina Indorewala			
Day/Lectu				
Day/Lectu	Qualitative analysis of Carbohydrates			
2	Qualitative analysis of Carbohydrates  Qualitative analysis of Carbohydrates			
3	Qualitative analysis of Proteins			
4	Qualitative analysis of Proteins			
5	Qualitative analysis of Lipids			
6	Study of different stages of Mitosis & Meosis using permanent slides.			
7	Study of different stages of Mitosis by Onion root tip squash method			
8	Study of different stages of Mitosis by Onion root tip squash method			
9	Separation of Amino acids by Paper chromatography			
10	Separation of Amino acids by Paper chromatography			
11	Preparation of Herbarium			
12	Preparation of Animal Album			
13	Study of floral organs by dissection of flower & representing it by			
13	floral diagram & floral formula			
14	To determine the frequency, density & abundance of vegetation by Quadrate	e method.		
15	Study of ecological adaptations in Hydrophytes & Xerophytes.			
16	Study of ecological adaptations in Hydrophytes & Xerophytes.			
17	Soil Analysis			
18	Soil Analysis			
19	Water Analysis			
20	Water Analysis			
21	Working out the Laws of Inheritance			
22	Study of Biogeochemical Cycles using Charts: Nitrogen Cycle			
23	Study of Biogeochemical Cycles using Charts: Carbon Cycle			
24	Study of Biogeochemical Cycles using Charts: Sulphur Cycle			
25	Study of Biogeochemical Cycles using Charts: Phosphorus Cycle

Lesson Pla	an for B. Sc. II Year Life Science (July 2020- June 2021)	
	BT+Chem+LS, Micro+Chem+LS	
	Subject: Practicals	
	Teacher - Prof. Sakina Indorewala	
Day/Lecture	Topic	
1	Perform histological study of root, stem & leaf for identification	
1	of monocotyledons & dicotyledons Plant System.	
2	Perform histological study of root, stem & leaf for identification	
2	of monocotyledons & dicotyledons Plant System.	
3	Study of floral organs by dissection of flower & representing it	
3	by floral diagram & floral formula	
4	Separation & identification of leaf pigments by Paper chromatogra	aphy
5	Separation & identification of leaf pigments by Paper chromatogra	aphy
6	Study of Plasmolysis & Deplasmolysis using Tradescantia peel.	
7	Study of Plasmolysis & Deplasmolysis using Tradescantia peel.	
8	Effect of Auxin on Plant growth.	
9	Effect of Cytokinin on Plant growth.	
10	Estimation of Hemoglobin	
11	RBC counting by Haemocytometer	
12	WBC counting by Differential cell count	
13	Blood Group test	
14	Clotting time Estimation	
15	Bleeding time Estimation	
16	Study of different Developmental Stages of Chick Embryo	
	Study & Comment on the histological slides and charts related	
17	to: Digestive system, Excretory system, Respiratory system,	
	Circulatory system, Muscular system, Nervous system,	
	Endocrine system, Reproductive system, & Developmental

BT+Chem+LS, Micro+Chem+LS		
	· · · · · · · · · · · · · · · · · · ·	
	Subject: Practicals	
	Teacher - Fatema Matkawala & Zahabiya Saifee	
Day/Lecture		
1 2	Monochrome staining Gram's Staining	
3	Negative Staining	
4	Endospore Staining	
5	Media Preparation: Nutrient Agar & Nutrient Media	
6	Cultivation Technique: Streak Plate & Pour Plate method	
7	Cultivation Technique: Streak Plate & Pour Plate method	
8	Isolation and enumeration of microorganisms from air	
9	Isolation and enumeration of microorganisms from air	
10	Isolation and enumeration of microorganisms from water	
11	Isolation and enumeration of microorganisms from water	
12	Isolation and enumeration of microorganisms from soil	
13	Isolation and enumeration of microorganisms from soil	
14	Isolation of Amylase producers from Soil.	
15	Isolation of Amylase producers from Soil.	
16	Isolation of Protease producers from Soil.	
17	Isolation of Protease producers from Soil.	
18	Isolation of Antibiotic Producing microorganisms from Soil	
19	Effect of UV radiation on Microorganisms.	
20	Use of Ethyl Alcohol as Sterlilizing Agent.	
21	Blood group analysis	
22	Differential WBC count	
23	To examine Flocculation reaction using VDRL test	
24	To observe the Agglutination reaction using WIDAL test	
25	Enumration of RBC	
26	DOT ELISA	
27	Oucterlony Double Diffusion Method	
28	Oucterlony Double Diffusion Method	
	Determine the concentration of unknown antigen using Radial	
29	Immuo Diffusion technique	
	Determine the concentration of unknown antigen using Radial	
30	Immuo Diffusion technique	
31	Chromosomal DNA isolation from Plant cells	
32	Chromosomal DNA isolation from Plant cells	
33	Genomic DNA isolation from Microorganisms	
34	Genomic DNA isolation from Microorganisms  Genomic DNA isolation from Microorganisms	
35	Chromosomal DNA isolation from Animal cells	
36	Chromosomal DNA isolation from Animal cells	
37	Germination of Seed in <i>in vitro</i> for Axenic cultures	
38	Primary Establishment of culture from leaf & stem explants	
39	Clonal Propagation	
40	Anther & Pollen culture & check the Viability of Pollens
